

The

NURSE

STAFFING

LEVELS

(WALES)

ACT

explained ..

What is the nurse staffing levels act?

This is a law to make sure hospitals have enough nurses to look after you.

How do we know how many nurses are needed to look after you?

We decide how many nurses are needed based on how poorly the children on the ward are.

How do we make sure there are enough nurses each day and night?

We check how many nurses are needed for each day and night according to the number of children on the ward and how poorly they are, if more nurses are needed extra nurses may be called in.

How often will we check how many nurses are needed on the ward?

We always make sure there are enough nurses on the ward, and also review this every 6 months in case any changes are needed.

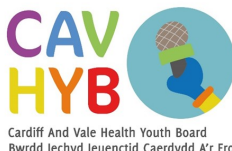

Any more questions about the number of nurses?

You can ask any of the nurses that are looking after you.
